

Project Manager R&D

Be a part of the future of healthcare- Not only a career but the opportunity to make a difference by “CREATING VALUE BY HELPING PEOPLE”.

If you are interested in transforming the healthcare sector worldwide, Q3 Medical will fulfil your needs for both personal and professional growth. We are a growth stage commercial company which is leading innovations in biodegradable implants and micro invasive technology for the Interventional Radiology, Gastro Intestinal, and open Surgical procedures which will change the face of healthcare, offering better clinical outcomes and reducing the overall cost of care.

On our mission to create new innovations while enhancing our current technology that provides for better clinical outcomes and reduces the total cost of care, we are searching for a Project Manager R&D to help us succeed in achieving our mission, playing a crucial role in bringing these new products to life and keeping innovation as a central tenet in our company. The ideal candidate is a highly organized self-motivated leader – taking the reins and motivating others to strive for excellence while delivering on time.

There is a tremendous opportunity to lead projects that will completely transform the healthcare sector. Q3 Medical Group is looking for a world-class project manager capable of managing multiple projects of varying scale, complexity, and focus. The ideal candidate will have a strong background in project management, be driven by product and process improvement, be able to balance effort across multiple projects, and collaboratively drive work forward with many stakeholders.

Location Winsen, Germany – flexibility with home office

What is the Day Job
